

## Tamper Seal / Anti-Sabotage Paint

Tamper Seal is used as an inspection paint to prevent tampering and reduce warranty claims on drain plugs, nuts, bolts, fasteners and assemblies. It is a quick-drying paint that identifies whether a part has been moved from its original position. This protects the service garage from false warranty claims due to tampering as well as assures the customer that their components were indeed inspected/replaced.

Tamper Seal is used extensively in a variety of industries – automotive, HVAC, aerospace, industrial. In fact, any service job in any industry that strives to make a component tamper proof should consider Tamper Seal.

Features / Benefits	Surface Uses
Highly visible mark provides warranty protection against tampering	Metal
Paint crack for visual indication of loosening or tampering	Wood
Universal and is compatible with all vehicles	Rubber
High temperature resistant	Plastic
Dry to touch: 15 minutes	Ceramics
Comes in five high-visibility colors	Glass
1.5 ounces of paint per tube; 300 tubes per master case	Textiles
Made in USA	Cement
